END OF THE "BAG & SAG" For Acrylic Fabric

Since the introduction of acrylic awning and boat fabric, awning manufacturers have found that regardless how tight one tensions acrylic fabric in a structure, it almost always bags and sags in wet weather and dewy mornings, but usually assumes a taut appearance when the sun hits the surface later in the day.

Supply Bright found a way to eliminate this negative in most instances.

The fabric is cut into ready-to-install panels and soaked in a water trough for about 16 hours overnight. The fabric is then inserted "wet", which puts the fabric into the frames at its maximum stretch point. Thereafter, since the fabric is uniquely tensioned in 360 degrees in the Supply Bright frame structures, it usually stays taut in any kind of weather.

This element can help separate one local company from the rest of the crowd in the marketplace. It is another key, distinctive feature of the Supply Bright System.

Twist & Lock Galvanized Staples

Same Staple
New Look

Supply Bright staples have gone through a manufacturing process change. Previously our staples were made by an old type single-wire machines process, today the staples are made by a new and advanced multi-wires machine process. The purpose of using the new multi-wire machines is to make our staples;

- have a better outlook
- have less glue marks
- have a more powerful performance
- have more stable quality/specifications
- have higher production efficiency

Our overseas manufacturing partner and their R&D Department have undergone sufficient testing of the new multi wire process by firing staples into the aluminum plates to verify the quality and performance of the multi wire process to match or exceed the old single wire process.

Please remember that these staples are verified and guaranteed to work with the "Matched Component System" and are manufactured to penetrate the staple channel of not more than 1mm thick. If the staples are not being used with our "Matched Component System" and the staple channel may be more than 1mm thick, adjustment to the air pressure may solve any staple penetration problem.

Any further question, please don't hesitate to let us know!

PVC INSERT FABRIC SELECTION CHART

The following PVC insert fabric selection charts compares Supply Bright's PVC Insert to various awning fabric colors to assist you in choosing the correct color PVC Insert for your fabric. Note that the colors selected are a close or sometimes exact color match to the fabric. However, it is the customer's final decision to select the proper colors to match. Also be aware that the printed colors, or screen colors, may not match the exact color of the insert or fabric.

Awning Kit Information

How To Request An Estimate For Your Awning Kit

Supply Bright awning kits offer you the opportunity to offer awnings to your customers. Our awnings will come to you with each truss cut and welded, and all lineal horizontals will arrive cut to proper length ready for assembly. Once the awning kit arrives, all you need to complete is the welding of the lineal horizontal to the welded trusses (or use our non-weld Fast Clips), stretch & staple the fabric on to the completed frame, add the PVC Insert and install.

Some benefits of our awning kits...

- 1) Custom designed and standard awning styles are available as awning kits.
- 2) No Inventory to carry.
- 3) No wasted aluminum.
- 4) No drops from fabrication.
- 5) Any size or style can be made into an awning kit.
- 6) Below is a sketch of our standard awning styles.

The following information is required for an awning estimate...

- 1) The width of each awning.
- 2) The height of each awning.
- 3) The projection of each awning.
- 4) The height of the sign band for each awning.
- 5) If awning fabric is requested, specify type, manufacture and color.
- 6) Is the awning kit to be egg crate ready?
- 7) Does the awning have closed ends?

*** It is recommended to submit to Supply Bright a sketch of the proposed awning with dimension listed ***

Review structural drawings with a Local Architect, Engineer, your Customer, and the local Political Subdivision Building Department(s) to be certain that these products meet suitability, fitness and legal building code compliance. Supply Bright makes no representation, either express or implied, that these drawings, and our fabrication meet your local building codes.

Awning Kit Information

How To Request An Estimate For Your Awning Kit - cont'd

Awning Fabrication Specifications...

- 1) All awning kits will be fabricated with 1" x 1" x .090 tubing unless specified in advance by customer.
- 2) Awning kits will have trusses welded together and each lineal horizontal will be cut to specific lengths to fit.
- 3) Fabric will NOT be attached to any framing. If fabric is ordered, all fabric will come in one roll. It becomes the customers responsibility to cut the rolled fabric to fit. Customers MUST verify fabric yardage prior to ordering.
- 4) Supply Bright does not fabricate free flowing valance.
- 5) There are different orientations of the fabric to fit the frame, it becomes the customers responsibility to inform Supply Bright how they prefer to orientate the fabric on the frame. Extra trusses or lineal horizontal made be needed to fit the fabric orientation, and charges for extra will be added to final bill.
- 6) Supply Bright offers fabric welding through a third party and will be billed to the customer by Supply Bright (please allow 2-3 weeks for all heat seaming). Supply Bright DOES NOT offer any eradication service or digital printing service.
- 7) Span between trusses will be 36 to 48 inches based on design and dimension of awning. If other spacing is required, please note at time of estimate request.
- 8) Due to UPS Ground shipping constraints, no one section will exceed 92 inches in width.
- 9) If "egg crate ready" is required truss spacing and lineal horizontal spacing will be designed to fit with a 24"x 48" egg crate with odd size space added to end of awning section. Supply Bright does not offer egg crates.
- 10) Staple groove orientation
 - a. Rear horizontal will have staple groove facing up.
 - b. Front and side (bottom of truss) will have staple groove facing down.
 - c. Sign band will have staple groove facing out.
 - d. All double truss pieces will have staple groove facing inwards toward each truss.
 - e. Free flowing valance will have staple groove on bottom of frame facing out.
- 11) Unless stated on quote, Z-Clips, PVC Staple Groove Insert, and Fast Clips are not included with awning kits.
- 12) Hardware for mounting, and attachments are not included. Electrical fixtures and components are not offered.
- 13) It is the customers responsibility to review any structural drawing supplied to or from Supply Bright with a local Architect, Engineer, you Customer and the local Political Building Department(s) to be certain that these products meet suitability fitness and legal building code compliance. Supply Bright makes no representation, either expressed or implied, that any drawings or our fabrication meet your local building codes.

METAL AWNINGS & CANOPIES

Wholesale To The Trade

A Solution To All Your Metal Awning Needs.

Supply Bright offers a simple solution for sign and awning companies to assist in providing to their customers various awning needs.

We create quality metal and fabric awnings to your specifications and sizes that will enhance any sign or building.

Our goal is to provide fully fabricated and finished awnings & canopies that are completely assembled and ready for installation.

The installation process is simple and secure and included with all products a complete installation package to guarantee a secure connection.

Send in your drawing and specifications for an immediate estimate!

FC-16

The FastClip System from Supply Bright eliminates the need for welding awning or sign components together. The FastClip System is also great for on-site repairs. No more bringing the awning or sign component back to the shop to fix a broken metal support. Using a screw gun, self-tapping tek screws and our FastClips most repair jobs can be done on site!

**Traditional Style Truss
Assembled with No Weld**

The FastClip system was originally designed with the FC-1 and FC-7 for quick and easy on-site repair. It was then developed into 11 different designs and used in combination, awning frames and sign components can be assembled to create or repair almost any size and shape awning or sign.

When used as part of the Matched component System, and Supply Bright's original extrusion profiles, the FastClips are designed to work together to make tight bond.

Awning Tools and More...

**MATCHED™
STAPLE SYSTEM
COMPONENT**

Sold Exclusively by Supply Bright

STAPLE GUN

Our lightweight, powerful pneumatic staple guns are designed especially for the staple in awning profiles. This unique staple gun fits snugly into the staple groove to cleanly pierce the aluminum and the fabric to hold the fabric securely in place against the staple channel.

AIR HAMMER

Our pneumatic hand held air hammer provides precisely the correct amount of cushioned force that is required to mold the staple groove insert securely in the staple channel.

TENSIONING CLAMPS

These versatile tensioning tools allow you tightly hold the fabric into the staple channel as you to stretch the awning fabric over the aluminum frame. As the tool clamps the fabric into the frame thus allowing you to position and create a drum tigh finish prior to stapling.

Z-CLIPS

These rugged mounting brackets are made from 1/4 inch aluminum, with an internal radius to meet our awning profiles. Use the Z-Clips to attach the awning frame to the building. Our aluminum Z-Clips have been designed to meet most building codes.

Now available in aluminum and steel.

AWNING STAPLES

Our 35 year old special design awning staples offer a Twist "N Lock feature that secures the fabric to the staple groove. The staple twist while being driven through the staple channel and locks the fabric into the staple groove offering a tighter bond between the metal and the fabric.

Available in boxes of 5,000 count or cases of 10 boxes.

STAPLE REMOVER

Forged from alloy tempered steel. A consistently made Osborne quality product. Carefully hardened for long lasting use. Hardwood handle with nickel plated ferrule.

Twist 'n Lock Staples

Why Trust Supply Bright Staples For Your Awnings?

Supply Bright "Twist 'n Lock" Staples

5/16" Crown x 3/8" Leg
(8.48mm x 9.53mm)

Supply Bright Twist 'n Lock staples offer a stronger hold on the awning material than the standard chisel staples. Our custom staple have been designed for the awning industry so the staple legs will flare out in opposite directions and twist as it travels through the staple channel. This Twist 'n Lock method draws the fabric tighter to the frame and enhances the locking of the fabric to the frame. Our Twist 'n Lock staple has been a proven industry design for over 30 years.

The chisel staple does not offer this unique Twist 'n Lock feature. In contrast these staple legs, when coming in contact with the staple channel, travel straight through the fabric and the staple channel. There is no increased locking of the fabric to the frame as in our staples.

Awning Chisel Point Staples

Our Twist 'n Lock staples are available in 5,000 count boxes and 50,000 count cases.

Awning Fabric Cleaner

Proudly Presenting **IOSSO®** Products

IOSSO MOLD & MILDEW STAIN REMOVER – Concentrated!

Color & Fabric Safe! Removes mold, mildew, algae stain, leaf stain, tree sap, bird droppings, spider droppings, tough dirt, grease and oil, food and drink stains, blood stains and more. Recommended for use on awnings, tents, boat covers, cushions, carpeting, umbrellas, campers, camping gear, inflatable, fabrics, vinyl, plastic and fiberglass. Safe for use on Sunbrella fabric. It is non-chlorine, biodegradable and has no harmful vapors. One jar makes up to three gallons of solution. One gallon cleans 150 sq. feet. Labeled in both English & French.

Available 4 oz. (makes 1 gal) 12 oz. (makes 3 gal.) and Special Order 65 oz. (makes 16 gals.)

IOSSO WATER REPELLENT – Invisible Protection!

Effective on all fabrics. It protects from water, soil, oil, bird droppings, and environmental pollutants. Recommended for use on awnings, canopies, tents, patio furniture, cushions, umbrellas, tarps, boat covers, Bimini tops, hunting fabrics, camping gear, leather, synthetics, and vinyl. Safe for use on Sunbrella Fabric. Formula is non-solvent, and non-silicon. One gallon covers up to 150 square feet. Labeled in both English & French.

Available in 32 oz spray and 1 gallon ready to use & 1 gallon concentrate(5 gals.)

IOSSO SEAM SEALER Invisible Protection!

IOSSO seam sealer prevents seams from leaking. It works best for use on cotton, cotton blends, polyester and synthetic woven fabrics. Water repellancy will vary with vinyl coated and vinyl laminated fabrics due to seam construction. It will not change the look or feel of the fabric. Ideal for boat covers, awnings, tents, backpacks, etc. Labeled in both English & French. Available in 4 oz applicator bottle & 1 gallon ready to use.

IOSSO Cleans it all! These flat compressed sponges pop up into a full sized sponge when wet. Super heavy duty sponges can be used to clean just about anything. Works well with the Iosso Mold & Mildew Stain Remover to clean boat seats, covers, windows, counter-tops, etc. Once wet they are 5-1/2" long x 2-3/4" wide x 1/4" thick. Super absorbent and long lasting. (Photo shows one flat, and one after it is wet.) Price shown is for one. Call for quantity pricing.

IOSSO VINYL and LEATHER CLEANER & CONDITIONER

Protects from Drying and Cracking. This special blend cleans and conditions in an easy spray formula. With the finest natural oils, it protect vinyl, leather, and rubber. It restores appearance, natural feel and makes scratches less visible. It leaves a light gloss and protects against drying & cracking. Non-silicone formula. Great for cleaning clear vinyl. Labeled in both English & French. Available in 16 oz. spray bottle, or 1 Gallon ready to use.

Additioanl Cleaners & Polishers

Proudly Presents

IOSSO®

Products

Products listed on this page are special order available in quantities listed.

ODOR BUSTER - Permanently stops odor on contact. Has No Odor, Leaves No Odor.

Available In: 4 oz., 32 oz., 1 gallon, and 5 gallons

E-Z SNAP - For Snaps, hinges and hardware. Lubricates, waterproofs, and reduces friction.

Available In: 1.5 oz

SAFE-T-SOLVE: *USDA Bio Preferred Formula.* Tough acting cleaner & de-greaser penetrates to lift grease, oil, carbon, adhesive, glue, ink, marker, surface rust, road tar, dried bugs, black streaks and more.

Available In: 4 oz., 32 oz., 1 gallon, & 5 gallon

FIBERGLASS RE-CONDITIONER - One Step - Restores and Protects. Removes oxidation, chalking, water line, water spots, tar and oils.

Available in: 16 oz., 5 pounds, & 5 gallons

IOSSO METAL POLISH: *Original Formula* - Removes oxidation, tarnish, surface rust, water spots, calcined deposit, tar, oil, grease and even removes graffiti from many surfaces without scratching or dulling.

Available In: 3 oz., 6 oz., & 5 pounds

LIVE WELL CLEANER: *Safe for Fish* - Cleans algae, mold & mildew, slime blood stains and odors. Great for live wells, bait buckets, coolers, thermos jugs, refrigerators & freezers.

Available in: 4 oz.

TEAK CLEANER: *Clean & Brightens in One Step* - Clean your teak without harsh chemicals. Biodegradable solution.

Available In: 16 oz., or 80 oz.

PONTOON CLEANER & POLISH: for Aluminum Pontoons and Boats - Removes oxidation, tarnish, surface rust, waterline marks, tars, water spots and oils.

Available In: 1 lb only

IOSSO METAL POLISH: *Bio Based Formula & Odorless* - Works the same as our original formula metal polish. Biodegradable, low VOC, low flame ability. Passes CARB requirements for metal polish in the state of California.

Available In: 1 lb, 5 lb, & 5 gallons

Tent & Camping Gear Cleaner - For use on all tenet fabrics, back backs, sleeping bags, cots, beds, chairs, canvas covers and tarps. Maybe use on vinyl, plastic, canvas, carpeting and wood. Removes dir, mold, mildew, algae, tree sap, leaf stains, bird droppings, most food & drink stains and blood stains.

Available In: 12 oz only

COOLER CLEANER: *Removes Mildew ands Deodorizes* - For coolers, ice chests, thermos bottles and plastic ware. Leaves no odor or residue.

Available In: 16 oz only

**60" and 47"
Solids**

Whether for fixed or retractable awnings, umbrellas, pergolas, architectural shading structures or the covers on your golf cart, Sattler has the perfect fabric. When it comes to performance and design, there is nothing better than Sattler. Sattler's 47" and 60" awning fabrics are made from 100% solution-dyed acrylic and guarantee top-level functionality.

Sattler's awning fabrics are labeled with a UV factor which ranges from 40 to 80; therefore they guarantee an effective sun protection. All products comprised in the collection are free of PVC, 100% woven with solution-dyed branded acrylic and are produced under strict quality controls in order to comply with the highest standards. With its high-tech products Sattler fulfills the quality promise to achieve premium quality and at the same time meets a wide range of demands.

60 Inch Solid Collection Overview

47 Inch Solid Collection Overview

This means that Sattler's fabrics promise:

- Bright and luminous colors for many years
- High UV fastness and durability
- Use of the best weather-proof outdoor fiber
- Outstanding dirt and water repellency
- Pleasant textile feeling
- Breath ability
- Easy installation and cloth Change

Recsystem

RECSYSTEM acrylic fabrics are the natural evolution of Recacril® fabrics, designed to achieve higher impermeability by enhanced coating process utilizing high-tech resins. Because the acrylic incorporates the same proven weaving technology as RECacril along with high-tech resins, results with an acrylic fabric with hydrostatic head rating over 1000 mm. The special coating formulation and implementation process provides additional resistance to crazing or wrinkling that often occurs during the manufacturing process with other acrylic fabrics. The coated side of RECSYSTEM does not show shine or have a whitish appearance due to the resin finishing, so it's coated back still has a much closer resemblance to the top surface of the fabric. RECSYSTEM is engineered providing a great solution for tougher environments where the need in keeping the covered spaces dryer, compared to what standard woven fabrics can provide.

Features:

- ☐ Outstanding fade resistance only solution dyed acrylic fabrics can provide.
- ☐ Withstands harshest weather conditions.
- ☐ Blocks up to 99% of harmful UV rays.
- ☐ Dirt and oil repellent, mildew resistant, and antibacterial.
- ☐ Superior water resistance due to double coating (Fluorocarbon both sides, acrylic resin one side).
- ☐ Combines waterproofness and breathability.
- ☐ Will not unravel when scissor or knife cut.

New undercoating

Recsystem's undercoating is nearly invisible from most angles, contains two different and highly effective antimicrobial agents, eliminates leaking and misting in driving rain storms, and is highly resistant to crazing and marking.

RECSYSTEM TECHNICAL FEATURES

Brand	Recsystem
Composition	100 % Solution Dyed Acrylic
Width	60" ±1 %
Weight	9.60 oz ±5 % (UNE 53352)
Finish	Acrylic resin one side, Fluorocarbon finished both sides
Water Column	>1000 mm (UNE EN ISO 20811)
Standard Roll Length	65.64 yds

One way we believe "we're woven differently" is the way we respond to consumer demand; we're continually looking to our customers to guide us as we diversify our product line. Based on an increasing demand for an acrylic fabric that has superior performance under extreme weather conditions, we present Recsystem, a highly durable resin coated solution dyed acrylic for the Marine and Awning Industry.

RECAcril® canvases are high-performance fabrics made from fade resistant solution-dyed acrylic fibers, specially designed for awning and sun protection products.

All spinning and weaving processes are optimized to give the canvas a high tensile and tear strength, and to produce an excellent surface finish for applying the Infinity Process high-tech coating.

The Infinity Process is a proprietary finishing technique that offers exceptional repellancy to water and dirt, superior dimensional stability, and creates a durable fabric that keeps its aesthetic allure over the life of the product.

RECAcril canvases are very easy to handle because the fabric has a consistent firm hand and excellent flat lay that makes it easy to cut, sew, and fabricate. The tight weave structure and smooth surface of RECAcril canvases make printing easier. These elements provide better adhesion of the vinyl when heat transfer equipment is used. If screen printing is used, the closed structure of the yarns allows less ink to pass through the fabric, resulting in sharper, better-defined prints.

RECAcril canvases follow rigorous quality control standards throughout the manufacturing process, meeting all requirements for obtaining approval of the UNE-EN 13561:2004+A1:2009 performance requirements for awning safety.

FEATURES:

- Tighter weave
- Superior Stability
- Unsurpassed fade resistance
- Better to cut and sew
- Proprietary Infinity finishing process
- Long lasting water resistance
- Stain resistance
- 10 year warranty

WEATHERTYTE® PLUS

WeathertytePLUS —and its lightweight version WeathertytePLUS Lite—is a premium, textured vinyl substrate used in awnings, canopies, umbrellas, pole banners, garden furniture, marine, and other specialty applications. These weather-resistant and fully waterproof materials offer the luxurious look, feel, and texture of decorative fabric.

WeathertytePLUS provides extremely effective coverage for any establishment, including retail stores, restaurants, country clubs, hotels, schools, public buildings, mixed-use projects, residential developments, strip malls, recreational vehicles (RV), mobile storage, and more. This new product is stocked in thirteen custom colors (plus white) to enhance any storefront while protecting windows and doorways from sun, rain, and snow. WeathertytePLUS is optimized for use with solvent, UV, and latex printers, and is receptive to pressure-sensitive film.

FEATURES & BENEFITS

- Look and feel of a woven fabric, with the benefits of a high-performance composite vinyl
- Excellent weatherability, easy to clean, and stain-resistant
- Waterproof
- Resists sagging
- Digitally printable, with virtually endless design options
- Easy to handle and highly durable throughout the fabrication process
- Less seaming during fabrication at 74" wide
- Heat weldable

QUESTIONS and ANSWERS

Q: How much slope should be on a flat roof awning?

A: Most building codes require a pitch of at least one-quarter inch per 12 inches. An awning with a 4-foot projection should have a minimum of a 1 foot slope from the building to the edge of the awning.

Q: How many Z-Clips should be used for mounting my awning?

A: Z-Clips should be placed approximately every 6 inches along the horizontal and vertical extrusions along the mounting surface.

Q: What is the largest Flex Face Frame we can make using the MP-5B?

A: The ultimate size of a MP-5B Flex Face Frame is virtually unlimited. Using the Back Set Brace (MI-20) and a back set bar placed in each corner and spaced every 4 to 6 feet, the frame can be of almost any size.

Q: What are the engineering properties for Supply Bright's aluminum awning extrusions?

A: The engineering properties for Supply Bright's awning extrusion can be found on our web site at: https://docs.wixstatic.com/ugd/48bb38_93f67bb365e84e91b711ce4bcb6ccda0.pdf?index=true

*Please note that this engineering information does **NOT** represent other manufacturers awning extrusion using the same product ID (i.e. MP-1A).*

Q: What is unique about the staples sold by Supply Bright?

A: Unlike standard staples that “punch” straight thru the fabric and metal, our staples have a “twist 'N lock” feature. This means that when the staple is being “punched” thru the fabric and metal, the staple legs will twist to the side securing the staples from being pulled directly out of the metal. Thus, holding the fabric more securely onto the frame against wind load.

Q: Are Supply Bright's staple guns different from other I can find on the open market?

A: Supply Bright's staple guns are manufactured by Apache and these can be found in many hardware and DIY stores. However, the units supplied by Supply Bright have been modified to fit fully into the staple groove and they are also re-designed to stop the crown of the staples from penetrating the fabric as the staples are “punching” thru the fabric and the metal.

Q: When do we use Fast Clips?

A: Fast Clips were designed with 2 applications in mind. The first application was for the Fast Clips to be used as an on-site repair tool for fixing broken aluminum frames without having to repair the frame in house, or have a welder on site. Just use the correct shape to cover the repair then attach the Fast Clip with tek screws.

The second application is to be used to assemble awnings without any welding. Supply Bright's Fast Clips come in over 10 different designs to meet different angles and connections of the aluminum framing of your awning. Using tek screws the Fast Clips are attached to the aluminum joints for a completed awning.

QUESTIONS and ANSWERS

Q: How far apart should the staples be in the staple groove holding in the awning fabric?

A: Staples should be placed every 2 to 4 inches apart throughout all staple grooves.

Q: How do I remove the black water stains that appear on the aluminum?

A: Using the AluminoX from Supply Bright Safely cleans bare aluminum by removing road film, grime, algae, scum, lime deposits, water stains and oxidation. Mill or brushed aluminum will never go back to the showroom finish. However, the whitish gray is 100% better than the oxidized black. Concentrated products makes 20 gallons.

Q: Is there anything that can be used to protect aluminum from rust and oxidation?

A: Supply Bright's OxiX is an innovative, bio-friendly, rust and oxidation barrier that preserves and protects all metals and a lot more. It can be used as a stand alone sealer or as a primer that can be painted over with excellent adhesion. OxiX dries within minutes providing you with a durable moisture and oxidation barrier on your surfaces that will last for years. OxiX can be applied over rusted or oxidized surfaces to prevent further corrosion. Even if the coating is penetrated, no rust or oxidation will creep back past the origin of the compromised metal.

OxiX has been specifically engineered to be one of the safest products on the market today. OxiX contains zero VOC's; so, it can be used in areas with low ventilation such as confined spaces. It is water-reducible, so solvent mixing has now become a thing of the past, making your work environment safer. There are no special disposal requirements and cleanup is as simple as washing with soap and water.

Q: Our customers awning has lost the ability to repel water, is there a water repellent coating that can be used?

A: Supply Bright is a dealer for Iosso Products and they offer a Water Repellent product that goes on most awning fabrics and dries with an invisible coating. It protects from water, soil, oil, bird droppings, and environmental pollutants. Recommended for use on awnings, canopies, tents, patio furniture, cushions, umbrellas, tarps, boat covers, Bimini tops, hunting fabrics, camping gear, leather, synthetics, and vinyl. Safe for use on Sunbrella Fabric. Formula is non-solvent, and non-silicon. One gallon covers up to 150 square feet.

Q: What is the best method to remove and mold & mildew, and clean, an awning?

A: Iosso Products, offered through Supply Bright, has a Mold & Mildew Stain Remover compound. That is safe for acrylic fabrics like Sunbrella. It is non-chlorine, biodegradable and has no harmful vapors. One jar makes up to three gallons of solution. One gallon cleans 150 sq. feet.

TERM AND CONDITIONS

Terms: All orders are pre-paid, unless prior arraignments are made & approved through Supply Bright, LLC. & their appropriate finance company. Supply Bright accepts Cash, Checks, Money Order, Wire Transfer, Visa, MasterCard, American Express, or Discover. Wire Transfers: \$20.00 fee for domestic wire transfers, \$60.00 fee for international wire transfer. Funds require bank clearance prior to shipping. N.S.F. check fee - \$25.00. All orders are final. Price subject to change without notice.

Sales Tax: Supply Bright, LLC is required by law to charge applicable state & local sales tax on every item for which sales tax exemption certification has not been provided on the 1st of every year. Renewed tax exempt certificates are to be supplied to Supply Bright, LLC (fax or e-mail) upon expiration of current certification.

Past Due Accounts: Unpaid past balance is subject to a 1 ½ percent finance charge per month (18% per year) or as directed by the appropriate finance company. Time calculation starts the day item is shipped. Orders on past due accounts will be put on hold pending resolution of balance.

Orders: Orders will be shipped from Supply Bright's proper fulfillment location; multiple freight charges may occur from different origin points. To guarantee orders to be processed correctly, a customer's purchase order should proceed any verbal orders. Supply Bright, LLC will not be held liable for any misunderstanding of part or in full of any & all verbal orders. Customer will be held liable for any & all orders. Supply Bright, LLC reserves the right to automatically fulfill back orders when product becomes available, unless backorder is cancelled in writing by customer. All metal orders are expected to ship in three to four business days from receipt of order and payment. All non-metal orders are expected to ship in two business days from receipt of order and payment.

Returns: All returns require pre-authorization return number. No returns are approved 15 days after sale & customized products are non-refundable. There is a 20% re-stocking fee (excluding customized products) on returned merchandise. Credit on account will be issued upon receipt of returned merchandise in new resalable condition. In-house credit ONLY will be issued for all returned merchandise. All customized products, & or fabricated products, cannot be cancelled & are non-refundable once order has been processed by Supply Bright, LLC. Fabric, awning kits, complete awnings, custom fabrication items, and used items are not eligible for return. Supply Bright is not liable for any costs or freight charges for the return of merchandise (in or out of warranty).

Warranty: Individual items carry their own limited guarantee / warranty. All Supply Bright products carry a 90-day warranty against defects in quality of workmanship from date of invoice. Any defective product within the first 90-day period are to be returned to Supply Bright for replacement. Supply Bright will cover regular ground shipment for the replacement of defective items.

All products returned for warranty service after the first 90-days will be serviced by Supply Bright who will service the unit with used parts that are equivalent or superior to new parts in performance. Supply Bright may, at their own discretion, replace the product with a new or used product. Freight to and from Supply Bright will not be covered for warranty and non warranty repairs after the first 90 days of ownership (from date of original invoice).

This Limited Warranty extends only to products purchased from Supply Bright or a Supply Bright authorized reseller. This Limited Warranty does not extend to any product that has been damaged or rendered defective (a) as a result of accident, misuse or abuse; (b) as a result of an act of God; (c) by operation outside the usage parameters stated herein; (d) by the use of parts not manufactured or sold by Supply Bright; (e) by modification of the product; (f) as a result of war or terrorist attack; or (g) as a result of service by anyone other than Supply Bright.

EXCEPT AS EXPRESSLY SET FORTH IN THIS WARRANTY, SUPPLY BRIGHT MAKES NO OTHER WARRANTIES EXPRESSED OR IMPLIED, INCLUDING ANY IMPLIED WARRANTIES OR MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. SUPPLY BRIGHT EXPRESSLY DISCLAIMS ALL WARRANTIES NOT STATED IN THIS LIMITED WARRANTY. ANY IMPLIED WARRANTIES THAT MAY BE IMPOSED BY LAW ARE LIMITED TO THE TERMS OF THIS EXPRESS LIMITED WARRANTY.

Supply Bright is not liable for any damages caused by the product or by the failure of the product to perform, including any lost profits, lost savings, lost sales, incidental damages, or consequential damages. Supply Bright is not liable for any claim made by a third party or made by you for a third party.

To obtain warranty service, please contact Supply Bright via E-mail at Sales@SupplyBright.net. For product warranty information please visit our web site at www.SupplyBright.net

Freight: All orders are delivered common carrier, & will be prepaid or sent freight collect (carrier will collect freight charges at time of delivery). Any freight quote given by Supply Bright, LLC its officers or employees (written or verbal) are just that – A Quote. Final freight charges are subject to change at time of pickup, & customer is responsible for paying any differences. All freight quotes are estimated to commercial address only. Supply Bright will not be held liable for delivery time or days. It is the customer's sole responsibility to inform Supply Bright of any orders shipping to a non-commercial address, any additional charges to non-commercial address after delivery will be charged to customer and due upon receipt.

Freight Claims: Freight claims are to be filed by the consignee or the paying party. It is the receiving party's responsibility, at time of delivery, to check for any visible damage to the product or the package & note such problems on bill of lading. Multiple photos of damage MUST be taken by receiving party. If the shipment was freight collect or customer payment, then the receiving party is responsible for ALL claim submission. Replacement product & freight will be charged to customer upon their request. If shipment was third party billing (by Supply Bright, LLC, or invoiced to the customer) photos & noted bill of lading MUST be submitted by the Consignee for proper damage claims. Supply Bright, LLC will not be held liable for delay of product or service due to freight claim/damages. Freight claims & replacement products WILL NOT be processed until all proper information & paperwork of damage is supplied to Supply Bright, LLC.

General Terms: Supply Bright, LLC acceptance of any order is subject to purchaser's assent of the terms & conditions set forth in the Supply Bright, LLC customer application/herein. Purchaser's assent to these terms & conditions shall be presumed from the purchase of all or any part of the goods & services ordered. No addition or modification of items or conditions shall be binding upon Supply Bright, LLC in writing. If the purchase order or other correspondence contains terms or conditions contrary to the terms & conditions contained herein, Supply Bright's Terms & Condition will apply.

All sales are final. All returns require a Return Authorization & restocking fee. Freight charges are not refundable, additional freight charges may apply. No cash refunds, company credit only on pre-approved returns. Non pre-approved returns will not be given company credit or refund. Supply Bright reserves the right to split orders & ship from multiple fulfillment centers & charge accordingly. Pricing for product and services may change without notice.
